

Ashutosh Kumar

Java Backend Developer | Spring Boot | Microservices | REST APIs | MySQL | AWS

+91-8210728770 | krashuu08@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Java Backend Developer with nearly **4 years** at Genpact building **Spring Boot** microservices for enterprise finance (Morgan Stanley) and healthcare platforms. Between roles since Dec 2025 — staying hands-on through an independent LMS backend project using **Spring Security (JWT)** and **PostgreSQL** to keep skills sharp and expand Spring ecosystem depth.

INDEPENDENT PROJECT

PaperLive LMS Platform — backend contribution to a friend's early-stage LMS startup

Jan 2026 – Present

Tech: Java, Spring Boot, Spring Data JPA, PostgreSQL, Spring Security, JWT, JUnit

- Built backend services and **REST APIs** using **Java**, **Spring Boot**, **Spring Data JPA**, and **PostgreSQL** for courses, users, enrollments, assignments, and placement workflows.
- Set up **Spring Security** with **JWT** authentication and role-based access control for students, instructors, placement teams, and admins.
- Handled database design, API validation, exception handling, file/document integration, and wrote **JUnit** tests for reliable backend functionality.

PROFESSIONAL EXPERIENCE

Consultant, Software Developer — Genpact India Pvt. Ltd.

Jul 2022 – Dec 2025

Project: Thunderhead (Morgan Stanley) — Enterprise Trade Processing Platform

Tech: Java, Spring Boot, Spring Data JPA, Microservices, REST APIs, MySQL, JPA/Hibernate, Node.js, GitHub Actions, GitHub Copilot

- Built **Spring Boot** microservices for trade processing across EQS and EQD asset classes. Owned the **REST APIs**, **JPA/Hibernate** data layer, and end-to-end service integration. Shipped features independently through SIT into production.
- Cleaned up slow **MySQL** queries and restructured trade and reference data — normalized tables, added indexes, improved query speed and data consistency.
- Set up automated trade-simulation tests using RECORD-based templates. Used **GitHub Copilot** to write them faster and ran validation through **GitHub Actions** — cut manual testing effort by **~20%**.
- Wrote **Node.js** integration scripts to move trade data between upstream and downstream systems.
- Mentored junior engineers on Java and Spring Boot — code reviews, debugging, design. Production defects dropped by **~15%**.

Project: Click Therapeutics — Digital Healthcare Platform

Tech: JavaScript, REST APIs, ReactJS, GitHub Actions

- Connected frontend to backend **REST APIs** across a healthcare app. Worked with backend devs and product to define API contracts. Shipped **15+** features to production.
- Configured **GitHub Actions** pipelines for linting, testing, and build checks on every PR — caught regressions **2-3 days** earlier.
- Wrote **50+** test cases for API-integrated components. User-reported bugs dropped by **~20%**.

TECHNICAL SKILLS

Languages: Java (11, 17), SQL, JavaScript (ES6+)

Backend & Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Spring Web, Spring Security, REST APIs, Microservices, JPA, Hibernate, Node.js

Databases: MySQL, PostgreSQL; schema design, normalization, indexing, query optimization

Cloud & DevOps: AWS (EC2, S3, CloudWatch), GitHub Actions, CI/CD, Git, GitHub

Testing: JUnit, SIT automation

AI-Assisted Dev: GitHub Copilot

Frontend (secondary): ReactJS, Redux, HTML5, CSS3, Tailwind CSS

Core CS: Data Structures & Algorithms, OOP, Design Patterns, SDLC, Agile, Scrum

EDUCATION

B.Tech, Electronics and Communication Engineering — NIT Jamshedpur (CGPA: 7.25)

2018 – 2022

Senior Secondary — Harprasad Das Jain College, Ara (69.8%)

2016 – 2018

Secondary School — M.D. Carmel School, Ara (CGPA: 10.0)

2006 – 2016
